

Dear SuperMAG Friend

Latest news from the SuperMAG service:

- 1) SuperMAG feedback needed.
- 2) THEMIS ground magnetometer data.
- 3) ACE solar wind data.
- 4) British Geological Survey now collaborates with SuperMAG.
- 5) Coming soon.

As always we are open to any feedback.

Best wishes,
Jesper

-
- 1) Request for feedback.

We ask that you spend a few minutes to provide information regarding any work where the SuperMAG site was used. This includes publications, presentations, dissertations, and any student involvement. Any format is fine. This will allow us to provide much needed feedback to the members of the SuperMAG family.

-
- 2) THEMIS ground magnetometer data.

With the help of Drs Angelopoulos and McGuire SuperMAG now includes THEMIS ground magnetometer data for the years 2004-2010. This is a significant expansion including data from more than 40 stations.

-
- 3) ACE solar wind data.

With the help of Dr. Weygand we have expanded the coverage of propagated solar wind data. SuperMAG now includes data until end of January 2010.

-
- 4) British Geological Survey now collaborates with SuperMAG.

A closer collaboration has been established between BGS and SuperMAG. The BGS PI is Dr. Susan Macmillan.

5) Coming soon.

- Polar VIS Earth Camera images will be included over the next few months.
- Significant expansions of the data holdings with an emphasis on recent years.
- Uniform gridded data allowing the user to select the interpolation technique.
- More...
